

A fixed point of trust.

The original Pinned K platform mark and the selected Star Cut Update service mark. Clean, flat vectors for websites, apps, games and integrations.

Pinned K

Platform identity. Gold is the signing bit.

Star Cut Update

Service identity. Stationary star, open geometry.

Production artwork reconstructs the approved concepts. Rubik Bold sets the wordmark; Rubik Regular sets the secondary badge phrase. All exported SVG text is outlined.

Colour, scale and clear space.

TOKEN	DARK SURFACE	LIGHT SURFACE
Violet	 #9a5cff	 #7a2fff
Gold bit	 #ffc24d	 #d07a00
Page ground	 #060912	 #f6f8ff
Star	 #ffffff	 #7a2fff

Optical size rules

16 px: use the separately drawn favicon/editor cut.

24–32 px: use the open service cut. No gold or gradients.

48 px and up: use the display master. Optional gold belongs only on the K terminal bit.

The rendered glyph size matters.

A 16 px logo at 2x density still uses the 16 px optical drawing. Do not substitute the 32 px geometry. Use the compact lockup when the full wordmark would make its mark smaller than 48 px.

Leave external clear space of at least one quarter of the glyph height. Preserve all internal gaps and the stationary star. Mono uses one ink. Rose stays reserved for display treatments; no blue or indigo is used here.

Powered by, with breathing room.

Horizontal / 376 x 144

Original horizontal relationship. Added vertical padding. A regular-weight secondary phrase. Do not trim the canvas to the artwork.

Compact / 232 x 88 minimum

Transparent, filled sticker and outline versions. Dark, light, black and white options. Use the sticker on busy imagery; use the matching transparent version on a clean surface.

Choose the right launch asset.

Website and PWA

[04-web/](#)

Adaptive SVG favicon, optical ICO, touch icon, 192/512 px standard and maskable icons, manifest and head snippet.

Apps and games

[05-app-icons/](#) + [06-games/](#)

Apple catalog and Icon Composer layers; Android adaptive/mono resources; ICO and ICNS; Godot 16 px cuts; 1080p/4K credits.

Partner and press

[02-lockups/](#) + [03-powered-by/](#) + [07-social/](#)

Outlined wordmarks, padded integration badges, avatars, social graphics, banners and splash layouts.

Developers and editors

[08-developer/](#) + [source/](#)

Accessible React component, currentColor sprite, design tokens, editable SVG paths, font license and reproducible exports.

The icon files are launch artwork. Configure app IDs, manifest scopes and native build settings for your product. Import Apple layers into Icon Composer if you need a layered .icon project. Print PDFs are vector RGB source artwork.
